HVAC REFRIGERANT 2 VALVE BRASS MANIFOLD

Man, what a Manifold

- Solid one-piece forged brass body and hose holder
- Valve assembly with quick action threads for 1/2 turn fully open or fully closed
- Encapsulated silicon **No Pointer Flutter®** gauges for unparallel durability and accuracy
- Metal hand wheels on extra long shafts provide ample knuckle clearance
- Large number, easy-to-read gauges
- Full port opening for maximum flow
- Color coded rubber gauge boots
- Removable plastic gauge lens face plug for easy zero reset of pointer
- Barrier hoses 1/4" female flare fittings w/Anti-Blowback

Valve Core Removal Tool

An extremely versatile tool designed for removal and replacement of valve cores without losing the system's refrigerant charge. Ideal for temporary removal of valve cores to achieve unrestricted line flow, which provides approximately 30% faster and more complete recovery, evacuation and recharge of a system. The optional 1/4" side port adaptor fitting can be used to attach a vacuum gauge at the system for improved accuracy or for faster vacuum with the valve core removed. The full flow ball valve swivels 360° for easy access to system service valves. Additional R134a quick connect adaptors are available for automotive service. Positive 1/4 turn on/off lever that provides instant visual confirmation if valve is open or closed. The core tool has a storage compartment in the handle, which holds up to 6 spare valve cores.

Soft Magic® Enviro is the hose with multiple snap-in service connectors that allow the service technician unlimited on-the-job flexibility. This revolutionary new concept for an environmental hose utilizes a micro sized full flow ball valve that accepts our patented interchangeable service connectors. You have the option of using a straight, 45° bend, 90° bend or a 6" Stinger Assembly. 2-year limited over-the-counter replacement warranty (call for details).
