"VYTOL" CABLE COVER

Our newest cable cover, manufactured of a recently developed vinyl-coated lightweight polyester fabric, offers exceptional tear strength and flame resistance.

The fabric has both mechanical and chemical adhesion with the coating, therefore eliminating lamination. It is ultraviolet light resistant which provides long life. Acids and other chemicals are also resisted by our special coating.

As a result of these properties, we are proud to add the "VYTOL" product to our cable cover line.

- Abrasion resistant
- Ultraviolet light resistant
- Acid/Chemical resistant
- Flame resistant
- Tear resistant

NUMBER	PRICE	DESCRIPTION
410V	\$41.36 EA	MIG-10-Width 4", Length 10'
415V	\$61.14 EA	MIG-15-Width 4", Length 15'
420V	\$82.43 EA	MIG-20-Width 4", Length 20'

#SGX-32M SOLD PER FOOT* \$5.21 PER FT

LEATHER CABLE COVER W/ SNAPS #M134

\$4.40 PER FOOT
SOLD PER FOOT (10' MINIMUM)

THE ORIGINAL MIG MUD FLAP N' WRAP™

The **MUD FLAP** lays over the Mig wire to prevent MUD from building up by paint over spray, debris, and grinding dust collecting on wire lubricant and being pushed into the gun liner.

The **MUD FLAP** helps new spool installation and reduces wire spring off due to over spinning of the spool.

The **MUD FLAP** fits most feed systems both spools and coils, and costs less than one liner change out.

The **MUD FLAP** used as a WRAP protects the wire off the feeder.
