BI-METAL BLADES CUT ALL METALS

(THOUGH TUNGSTEN CARBIDE GRIT BLADES ARE BEST FOR CUTTING HARD METALS SUCH AS STAINLESS STEEL.) ALUMINUM CUTS BEST WITH 14 TEETH PER INCH. A FINER TOOTH MAY LOAD!

TUNGSTEN CARBIDE GRIT

Each of our New Tungsten Carbide Grit Saws gives you thousands of tungsten carbide cutting edges permanently bonded to a tough alloy blade body. The super hard and abrasive properties of this grit material allow these blades to cut a wide range of materials that standard blades can't handle. Let our hard New edge give you "the Edge" Over your competitors! !
