

Powerful, versatile screwdrivers, built to last a lifetime.

Metabo screwdrivers have exceptionally efficient purer copper winding motors running in ball and roller bearings, all of our screwdrivers are reversible and have infinitely variable electronic speed controls. They have magnetic bit holders, and fully adjustable depth settings. Auto stop carbon brushes are fitted as standard, to eliminate a common source of armature damage.

Depending on the model, slotted head screws, drywall screws and sockets can be driven, along with phillips screws. Our models range from 71 - 354 inch lbs. of torque, yet weigh just over 4 lbs. each: very light for the power available.

Whichever screwdriver you choose, you'll get the legendary Metabo advantages of power, longevity and balance. After all, we've been building tools since 1924. And for over 80 years, we've dedicated ourselves to helping customers all over the world achieve better, faster results with a lot less down time.

The motor housings are designed to allow the operator to hold the tool with an "in-line" grip which helps insure driving the screw in straight.

DWSE6.3 (only)

450 Watt Electronic Screwdrivers

SE5025R+L
Order #05025

- Two-part depth stop
- Quiet claw clutch
- Vario speed (V) electronics
- Fine-adjustable screw depth
- Forward and reverse running
- Depth stop bush with front aluminum part
- Magnetic bit holder with quick clutch
- Belt clip for hanging up the machine

SE5040R+L
Order #05038

High speed

550 Watt Electronic Screwdrivers

DWSE6.3
Order #20001

- 10-way adjustable torque
- Forward and reverse running
- Fine-adjustable screw depth
- Two-part depth stop
- Quiet claw clutch
- Tool change with quick clutch
- Die cast aluminum gear housing
- Optimal cooling by axial/radial fan
- Depth stop bush with front aluminum part
- Depth stop can be fully removed for inspection during operation
- Sand-blasted fine quality cast claw clutch for long service life
