Sioux Tools, Originally named Albertson & Company, has a long and proud heritage of innovation. The company was started in November of 1914 by Swedish toolmaker, Oscar Albertson, and office boy, Harold Jacobson, with a goal to become the "best machine and tool shop". In early 1917, Oscar Albertson designed a valve lathe-a hand tool used to seat engine valves. Sioux has since grown to become a trusted partner by a wide range of industrial and manufacturing segments.
