## TIG / MIG Leather Guide

Choosing the right leather makes a big difference. Use the following chart to help decide on the right TIG / MIG glove leather for the job. In general, thinner, more supple leather has the least loss of dexterity while thicker leather provides more durability. \*The term "dexterity" is used here to represent the amount of feel and control retained.

### TIG / MIG Leather Dexterity vs. Durability Chart

	Deerskin	Kidskin	Goatskin	Cowhide	Pigskin
Dexterity	★★★★★	★★★★	★★★	★★	★
Durability	★	★★	★★★	★★★★	★★★★★

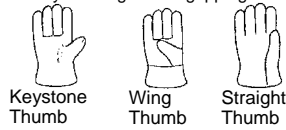

Five '★' represents the best in the category. (Elkskin is rated like Deerskin)

### Glove Thumbs

**Keystone Thumb.** Conforms to the natural shape and position of the thumb resulting in superior movement and comfort.

**Wing Thumb.** Angled construction allows good flexibility with no seams on the palm side to obstruct work or wear out.

**Straight Thumb.** Basic design that points vertically and is good for gripping.

### Glove Cuffs

**Knit Wrist.** Designed to fit snugly.  
**Safety Cuff.** General purpose, 2-1/2" cuff.  
**Gauntlet Cuff.** Extra protection, 4-1/2" cuff.

**Glove Welting -** A thin piece of leather sewn into the seams to protect threads against sparks and abrasion.

**Flex-Tuff®**  
**Latex Rubber Dipped**  
 Cotton/Polyester Work Gloves  
 With Textured Palm

\$3.95 Pr # 9680-S  
 # 9680-M

HEAVY-DUTY  
 Reinforced Palm  
 & Index Finger  
 # 84423 \$3.45 Pr

## GLOVE CHART

To Find Your **Glove Size** - Measure around your hand, above the V of the thumb. This will give you the circumference in inches. Compare it to the measurement table to find your corresponding glove size. The last digit(s) of the part number declares the glove size.

Size	XS	S	M	L	XL
Inches	6"-7"	7"-8"	8"-9"	9"-10"	10"-11"

## TIGSTER™
